## FLANSCHEN FÜR RECHTECKHOHLLEITER MIT NORMALPROFIL

### 1. Einleitung

#### 1.1 Geltungsbereich

Metallische Rechteckhohlleiter mit Normalprofil zeichnen sich durch ein Breiten- zu Höhenverhältnis von exakt oder näherungsweise 2:1 aus. Normalprofil-Hohlleiter sind genormt in IEC 60153-2, EIA-261, MIL-DTL-85, MOD UK DEF-5351 und anderen.

Zur Verbindung von Normalprofil-Hohlleitern existiert eine Vielzahl von Hohlleiterflanschen. Diese sind im Detail maßlich festgelegt in den Normen IEC 60154-2, EIA-166, EIA-271, MIL-DTL-3922, MOD UK DEF-5352 und anderen.

#### 1.2 Zweck

Zweck dieses Dokuments ist es, einen schnellen Überblick über die unterschiedlichen Formen der Flansche und ihre Hauptabmessungen zu geben. Des Weiteren wird eine einfache Bestimmung der normgerechten Flanschbezeichnung ermöglicht.

#### 1.3 Anmerkungen

Trotz großer Sorgfalt bei der Zusammenstellung der Flanschdaten können sich noch einzelne Fehler in die Tabellen eingeschlichen haben. Für konstruktive Arbeiten muss daher trotzdem die jeweilige Norm konsultiert werden.

**Dieses Dokument ist kein Produktkatalog. Es kann nicht zur Bestellung von Rohflanschen verwendet werden.**

## FLANGES FOR ORDINARY RECTANGULAR WAVEGUIDES

### 1. Introduction

#### 1.1 Scope

Hollow metallic waveguides with ordinary rectangular cross section are characterized by a width-to-height ratio of exactly or approximately 2:1. Such waveguides are standardized in IEC 60153-2, EIA-261, MIL-DTL-85, MOD UK DEF-5351 and others. For interconnection of ordinary waveguides there exists a plurality of waveguide flanges. They are defined in detail by the standards IEC 60154-2, EIA-166, EIA-271, MIL-DTL-3922, MOD UK DEF-5352 and others.

#### 1.2 Purpose

This document is intended to provide a quick overview of the various flange geometries with their basic dimensions. Another aim is to give standard-complying flange designations.

#### 1.3 Remarks

Great care has been bestowed to compile the flange data. Nevertheless, there might be a few mistakes. For design work, it is thus necessary to check the corresponding standard.

**This document is not a product catalogue. It cannot be used to order raw flanges.**

2. Legende zum Tabellenteil

2. Explanation for the Tables

2.1 Hohlleiterbezeichnungen

2.1 Waveguide designations

<b>WR 2300</b> EIA designation	<b>R 3</b> IEC designation	<b>WG 00</b> UK designation	
for frequencies of about 100 GHz and above			
<b>WR 10</b> EIA designation	<b>R 900</b> IEC designation	<b>WG 27</b> UK designation	<b>WM-2540</b> IEEE designation

Eine Zusammenstellung der Innenabmessungen von Normalprofil-Hohlleitern und vieler anderer Profile ist im Technischen Dokument TD-00036 "Cross Reference for Hollow Metallic Waveguides" der SPINNER GmbH gegeben.

A compilation of inner dimensions of ordinary rectangular waveguides and many other profiles is given in the Technical Document TD-00036 "Cross Reference for Hollow Metallic Waveguides" of the SPINNER GmbH.

3. Dokumentenversionsverwaltung

3. Document Revision Control

Issue	Date	Description
L	2022-12-06	- Issue K contained several damaged figures. These have now been corrected.
K	2022-11-24	- The designations of several EIA and MIL standards have been updated. - Several minor corrections were made throughout the whole document.
J	2020-04-28	- Several corrections of flange thicknesses (dimension C) were necessary due to the unification of the thickness definition. - Flange CCR 220 was added. - Several minor corrections were made throughout the whole document.
I	2020-04-27	Issue index I was intentionally skipped.
H	2020-04-17	- Start of the document revision control. - Some descriptions in section 2.2 have been refined. - A new field for alternative flange designations has been created. - Some SPINNER F-numbers have been changed or added. - The definition of flange thickness (dimension C) has been unified, which has led to many deletions or changes in this value. - Most UK flanges could be checked against the DEF-5352:1958 standard. This resulted in the addition of four UK flanges and several minor corrections. - Most of the flange description fields have been arranged differently to better illustrate their species relationship. - Fields with IEC flanges were colored light green to indicate the preferred character of these flanges. - Several minor corrections were made throughout the whole document.
